History & Lineage

Aura Reading emerged in the 1960s, in California, channeled by Lewis S. Bostwick. Founder of the Berkeley Psychic Institute and the Church of the Divine Man, he channeled and systematized the techniques and tools sent by the angels, to assist in the process of evolution of humanity.

Lineage: Berkeley Psychic Institute → Anastasia Plunk → Angelina Ataide → ROSES OS

LEVEL 1 OF 3

Foundational Practices

Slides 1–18

1

The Rose

The Rose is the foundational symbol and tool of this practice — a living energetic instrument used throughout all levels of the work.

2

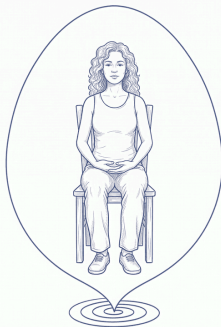

Meditation Posture

Proper meditation posture is seated upright in a chair. Feet are flat on the floor, hands resting gently on the thighs or knees, spine upright, eyes closed. The body is relaxed yet alert — grounded and receptive.

3

Grounding Cord

The grounding cord is an energetic connection that extends from the base of the spine (first chakra) downward into the center of the Earth. It anchors your energy body to the planet, providing stability, safety, and a channel for releasing unwanted energy.

4

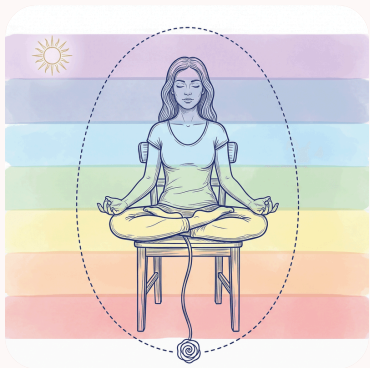

Golden Sun

The Golden Sun is a tool for replenishing and restoring your own energy. Visualize a radiant golden sun above your head. It calls back your own life-force energy from wherever you may have left it — in people, places, situations, or time. It fills you with your own highest vibration.

5

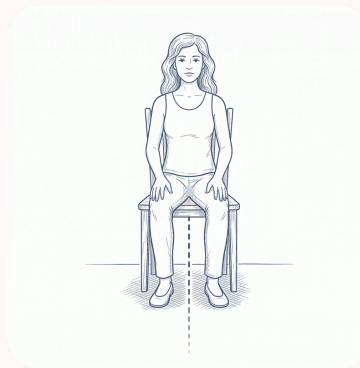

An Exercise to Feel Your Aura

The aura is the energetic field that surrounds your physical body. This exercise helps you become aware of its presence, its edges, and its quality. The aura consists of multiple layers radiating outward from the body.

6

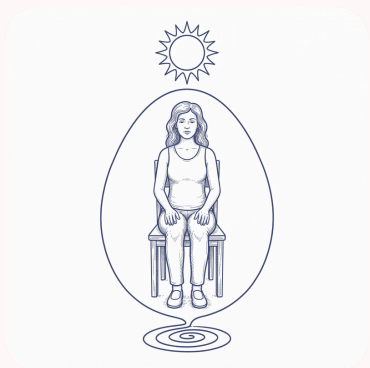

Expansion of Grounding Cord

Once you are aware of your aura, the grounding cord practice deepens. You ground not only the physical body but also the aura itself — allowing the entire energy field to anchor into the Earth.

7

Golden Sun Fills You

The Golden Sun above the crown pours golden light downward, filling the entire aura and body with your own highest vibration. This completes the full energetic architecture: posture, aura, grounding cord, and golden sun — all active together.

8

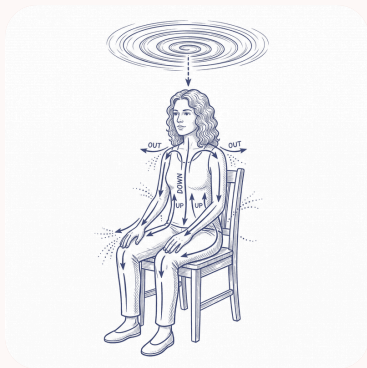

Circuit of the Energy of the Earth

The Earth circuit is an energetic pathway that draws the energy of the Earth upward through the feet, rising through the legs and into the body. This circuit connects you to the grounding, nourishing, stabilizing force of the planet.

9

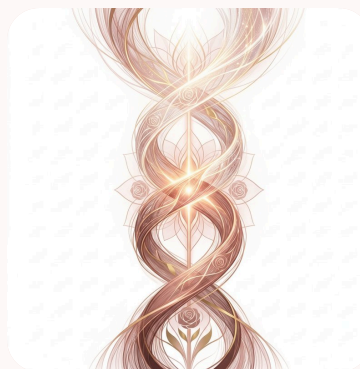

Circuit of the Energy of the Cosmos

The Cosmic circuit is an energetic pathway that draws cosmic energy downward through the crown of the head (7th chakra) and into the body. This circuit connects you to the higher frequencies of universal consciousness, inspiration, and spiritual guidance.

10

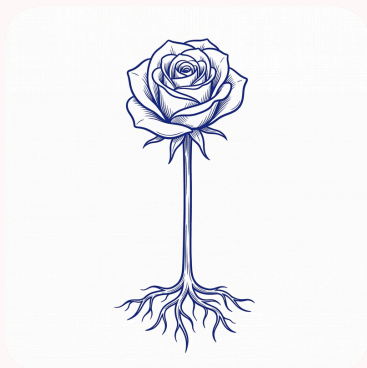

Circuit of Energy of Cosmos and Earth

When both circuits are activated simultaneously, the energies of the Earth and Cosmos flow together through the body. Earth energy rises from below; Cosmic energy descends from above. They meet and blend within the body, creating a unified field of balanced, integrated energy.

11

The Rose (as Energetic Tool)

The Rose is used as a living energetic instrument throughout the practice. It has roots (connection to source), a stem (channel of energy), and a bloom (the active, radiant tool). The Rose can be placed, moved, opened, closed, and released according to the needs of the meditation.

12

Roses of Protection, Observation and Separation

Roses are placed at the edges of the aura to serve as energetic sentinels. They perform three functions: Protection — They define and guard the boundary of your aura. Observation — They help you notice what energies are approaching or interacting with your field. Separation — They create healthy energetic distinction between your energy and the energy of others.

13

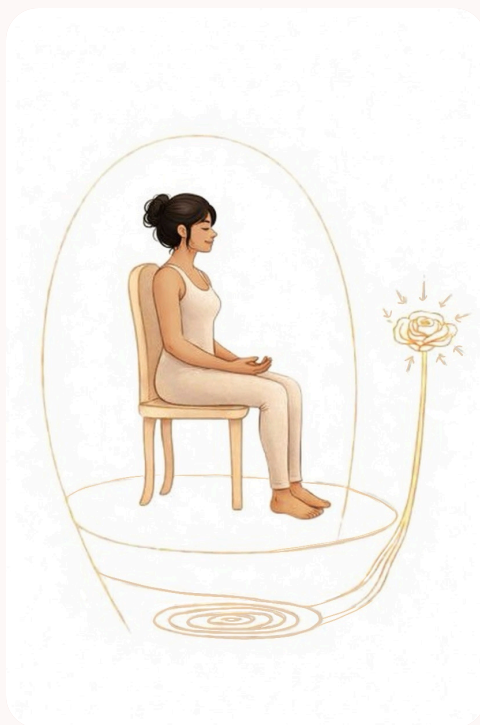

Cleansing Rose

The Cleansing Rose is placed outside of the aura. It is used to absorb and transmute foreign or stagnant energy from within your field. Energy that does not belong to you — from other people, environments, or experiences — is drawn out of the aura and into the Cleansing Rose, where it is neutralized.

14

Energy Recovery of Each Chakra

After cleansing, the Rose is used to recover your own energy that has been left in or taken by others. The Rose is sent out as an instrument to gather and return your own life-force energy to each chakra, restoring fullness and sovereignty to each energy center.

Let's Create Your Sacred Space

Level 2 begins with creating your own sacred space — an internal energetic environment that serves as your meditation home. This is the space from which all deeper work is conducted.

18

The 6th and 7th Chakras (Sacred Space)

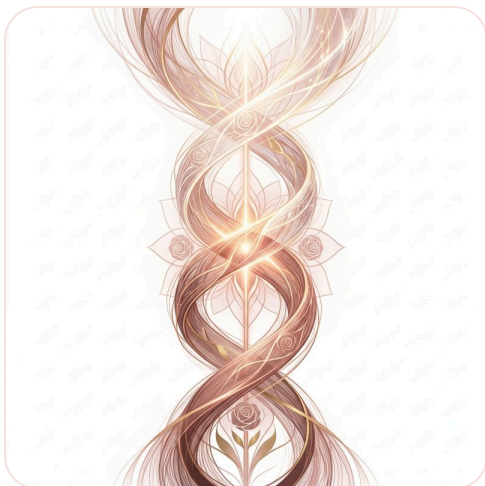

Understanding the locations and roles of the upper chakras is essential for Level 2 work: 6th Chakra (Third Eye) — Located at the center of the forehead, between and slightly above the eyebrows. 7th Chakra (Crown) — Located at the top of the head.

LEVEL 1 COMPLETE

18 Foundational Slides

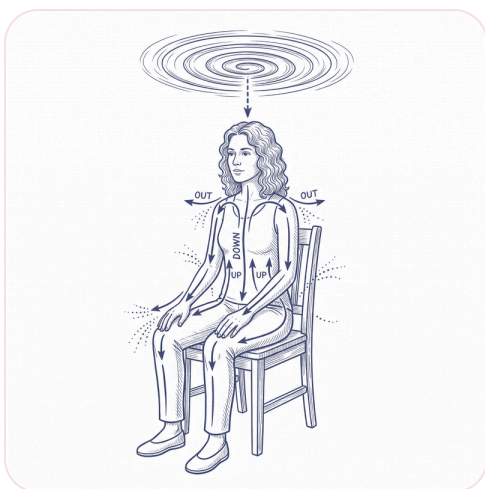

This concludes the Level 1 visual aids. All foundational tools — grounding cord, golden sun, aura, circuits, roses, and sacred space — are now referenced.

8 Circuit of the Energy of the Earth

The Earth circuit is an energetic pathway that draws the energy of the Earth upward through the feet, rising through the legs and into the body. This circuit connects you to the grounding, nourishing, stabilizing force of the planet.

9 Circuit of the Energy of the Cosmos

The Cosmic circuit is an energetic pathway that draws cosmic energy downward through the crown of the head (7th chakra) and into the body. This circuit connects you to the higher frequencies of universal consciousness, inspiration, and spiritual guidance.

10 Circuit of Energy of Cosmos and Earth

15 Pink Rose Closure

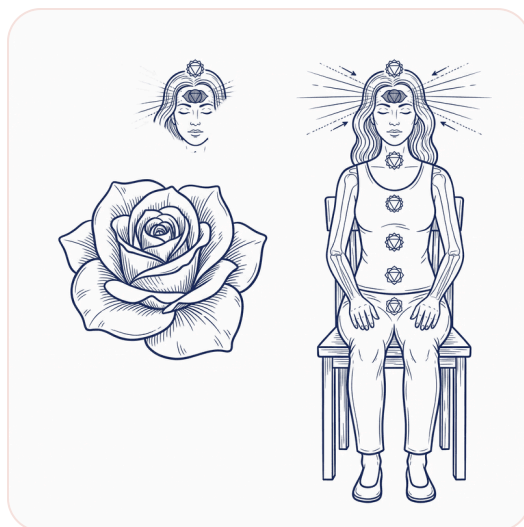

The Pink Rose Closure is offered at the end of the meditation as a gift of well-being. Visualize "Happy, Healthy, Whole, Body, Mind & Soul."

17 Let's Create Your Sacred Space

Level 2 begins with creating your own sacred space — an internal energetic environment that serves as your meditation home. This is the space from which all deeper work is conducted.

18 The 6th and 7th Chakras (Sacred Space)

Understanding the locations and roles of the upper chakras is essential for Level 2 work: 6th Chakra (Third Eye) — Located at the center of the forehead, between and slightly above the eyebrows. 7th Chakra (Crown) — Located at the top of the head.

The Sacred Space is the culmination of Level 1 — where all foundational techniques come together in unified awareness.

LEVEL 2 OF 3

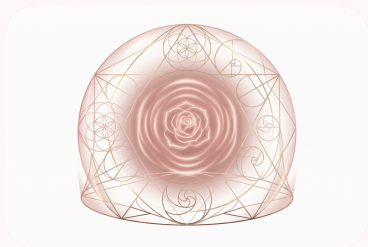

Space Preparation & Chakra Activation

Slides 19–38

19

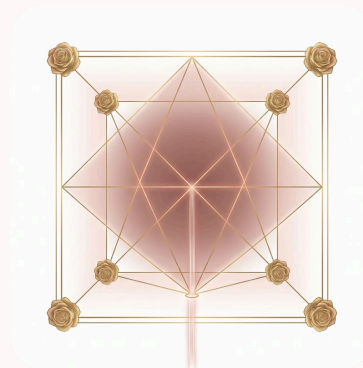

Let's Prepare Your Physical Space

Before meditation, prepare your physical environment to support the energetic work. The external space should mirror the internal intention: clean, clear, quiet, and intentionally held.

20

Protection of the Space

The physical meditation space is protected by creating an energetic grid using roses. Golden roses are placed at the four corners (and above/below) of the space, connected by lines of golden energy forming a sacred geometric structure — a container for the work.

21

Cleansing of the Space

Once the space is protected, it is cleansed. A large Cleansing Rose is placed above the grid, and golden energy pours downward through the entire structure, clearing all foreign, stagnant, or disruptive energies from the space.

22

Owning Your Space

After protection and cleansing, you claim ownership of the space. This is an act of energetic sovereignty — declaring the space as yours, filling it with your own energy and intention. The space becomes an extension of your aura and your practice.

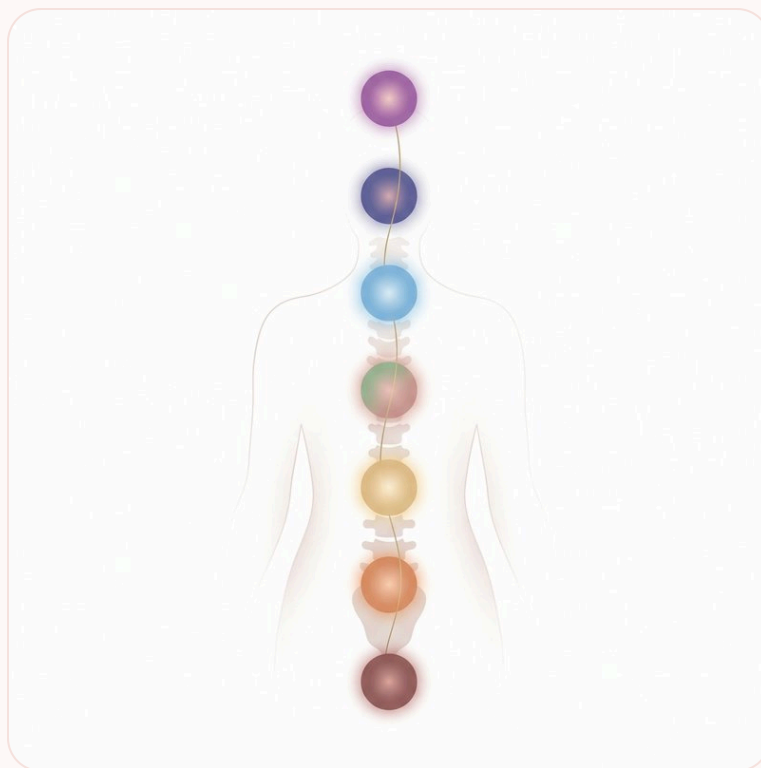

23

Cleansing of Each Aura Layer

The aura is composed of seven layers, each corresponding to a chakra. In Level 2, each layer is individually cleansed from the outermost to the innermost: 7th, 6th, 5th, 4th, 3rd, 2nd, and 1st Aura layers.

33

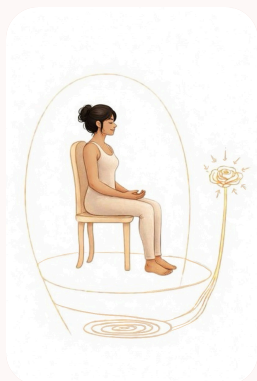

Cleansing of Each Chakra

Each individual chakra is cleansed using roses. The roses address two dimensions: Dynamics of the Past — Energetic patterns, imprints, and blockages carried from past experiences. Dynamics of the Present — Current energetic influences, relationships, and situations affecting the chakra.

34

Energy Recovery of Each Chakra

After cleansing, the energy recovery process is repeated at a deeper level. The Rose is sent out to gather and return your own energy to each individual chakra, restoring sovereignty, vitality, and wholeness to each energy center.

Golden Sticky Roses — All Four Phases

35

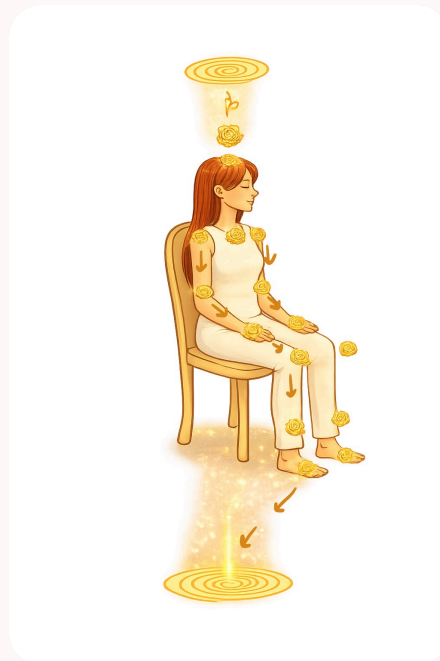

Phase 1 — Chakras

Golden sticky roses are placed on each of the seven chakras, drawing out foreign energy lodged in the energy centers.

36

Phase 2 — Joints

Golden sticky roses are placed at the joints and extremities of the body — shoulders, elbows, wrists, hands, hips, knees, ankles, feet — drawing out foreign energy stored in the physical body.

37

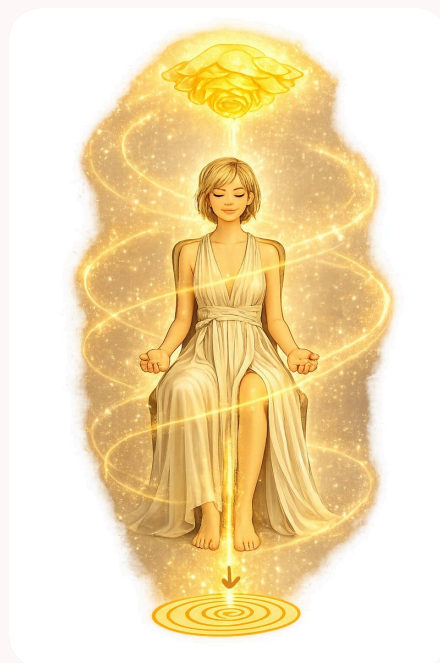

Phase 3 — Full Body

Golden sticky roses are placed throughout the entire body —

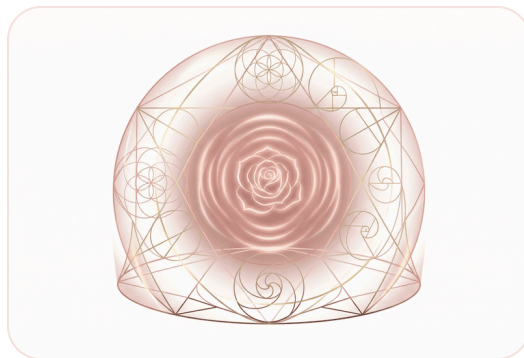

38

Phase 4 — Release

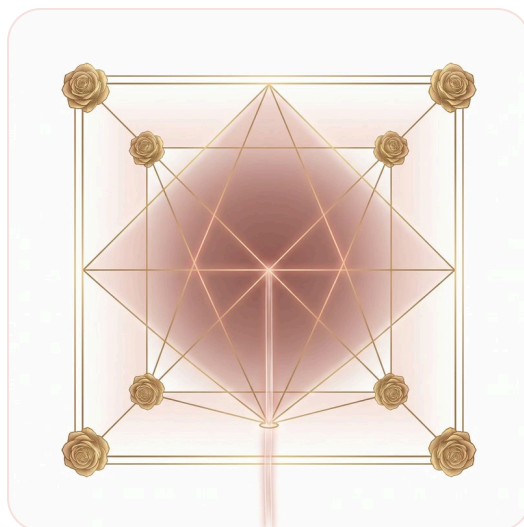

After the golden sticky roses have done their work, a large

The physical meditation space is protected by creating an energetic grid using roses. Golden roses are placed at the four corners (and above/below) of the space, connected by lines of golden energy forming a sacred geometric structure — a container for the work.

LEVEL 3 OF 3

Advanced Practice

Slides 39–44

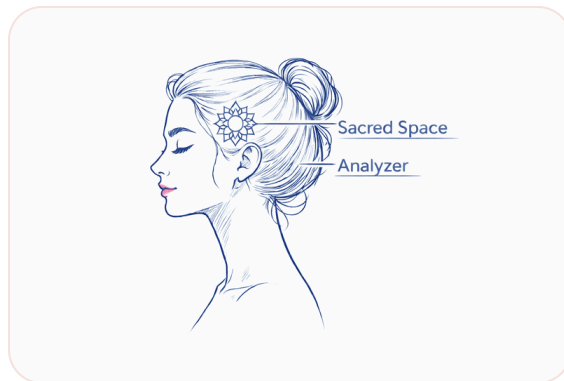

39 The Analyzer

The Analyzer is an advanced tool introduced in Level 3. It is an energetic point located at the back of the head, at the base of the skull (the occipital ridge / brainstem area). The Analyzer is used for deeper perception, reading, and discernment of energy — a tool for precise energetic analysis.

40 The Analyzer & Sacred Space

A combined reference showing the Analyzer in relation to the sacred space. This image illustrates how the Analyzer — the energetic point at the base of the skull — operates within the context of the protected, cleansed sacred space established in Level 2. The two work together: the sacred space provides the container, and the Analyzer provides the perceptive tool for deeper energetic reading and discernment.

41 Stick of Agreements

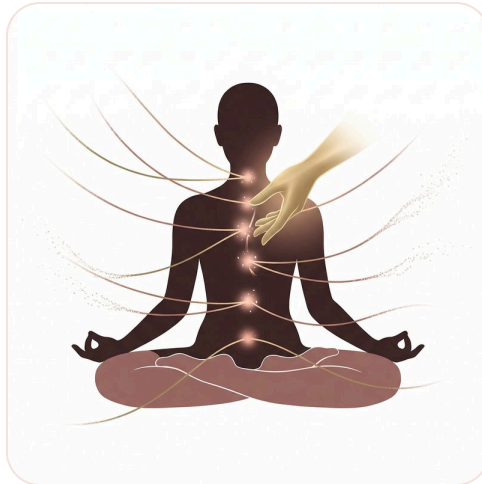

A relationship can only manifest in the material world if it is sustained by a spiritual agreement. Such agreements are formed with the consent of both parties on a spiritual level and may be dissolved by either party through conscious will.

Each time a spiritual agreement is created, a “stick of agreements” is formed between the individuals involved. Through this Rose Meditation technique, it is always possible to dissolve these sticks of agreements. This process should be approached with great awareness, as it carries very tangible consequences in our lives.

To break these agreements: Create a high-vibration situation (e.g. right after Roses Meditation) • Visualize the stick of agreements containing all the agreements you want to break • Break this stick into three pieces • Create a grounded Rose • Place the three pieces in this Rose • Explode the Rose outside the Aura.

42 Cutting Cords

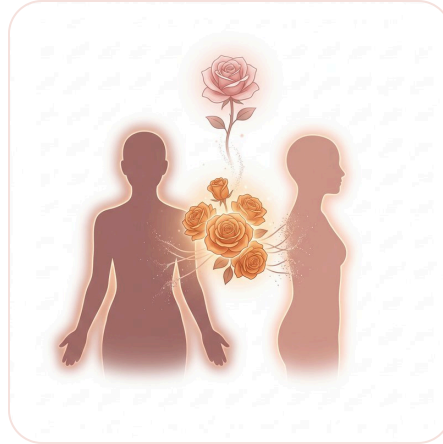

We engage in energetic interactions with others constantly — when we see them, hear them, touch them, and even when we think about them. When energetic cords are formed, our auras connect through these ties, allowing energy to flow between us. This is why we can often sense what is happening to people close to us, even at a distance.

When relationships come to an end, we may be deeply affected by the energies that continue to reach us through these bonds. For this reason, it is important to know how to consciously cut them:

- Close your eyes
- Visualize your aura with bonds coming out of your chakras
- Place your dominant hand on the 7th cervical vertebra, located at the junction of the neck and back at the level of the 5th chakra
- Intend that your hand has the power to cut all cords
- Make the cutting motion under your 1st chakra, placing your hand on the chair where you are sitting.

We can also cut the ties when the relationship has not ended, but we feel we need more neutrality. These ties reform very quickly when we reconnect with the person.

43 Post Intimacy / Sexual Recovery Rose

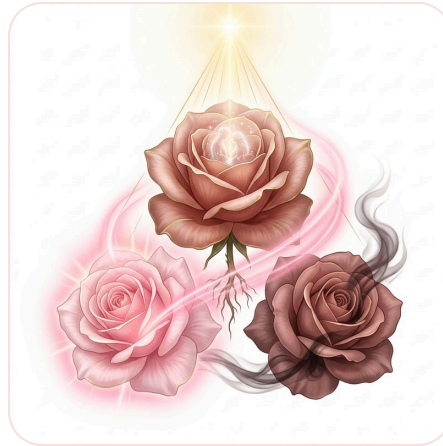

After sexual intercourse, if you want to recover any energy you may have left with the other person and return any energy they may have left with you, follow these steps:

- Perform the preparation techniques (grounding cord, Golden Sun, Earth and Cosmos energy, sacred space)
- Create an orange Rose and place the person's energy in it with their physical body, emotions, and feelings that may arise at that moment — you can visualize the person entering the rose, the situation you just experienced; explode (you can repeat this step as many times as necessary)
- Create an orange-colored unrooted Rose that cleanses any energy from the person that may have remained in any layer of your aura; explode
- Create a grounded orange Rose and intend for this rose to recover energy that remained with this person; explode
- If you want to remain energetically separate from this person, make the movement of cutting the energetic cords
- Create an unrooted pink Rose, place the person in it, visualize them happy with complete health in their body, mind, and soul. Repeat mentally: "Happy, healthy, whole, body, mind and soul." Make the Rose rise toward the center of the universe, wishing the best for them
- Renew your grounding cord
- Fill yourself with the light of the Golden Sun
- Place your hands on the ground to discharge excess energy.

You can also use this technique for relationships that happened a long time ago or when you end a relationship.

44 Mock Up

The Mock Up is a technique for manifesting situations or outcomes on the physical plane. It should be used only for oneself; it cannot be performed on behalf of another person. For it to be effective, it must be practiced for seven consecutive days and focused on one goal at a time. The higher your vibrational state while creating the mock-up, the more effective the process will be.

- Create a grounded Rose and inside that Rose imagine what you want, creating the image with as much detail as you can
- Create a second grounded Rose placed to the right of the first Rose. Intend for this Rose to cleanse all energy that does not belong to the first Rose, any type of blockage that interferes with the realization of what you desire
- Create a third pink grounded Rose (the color of Divine Love). In this Rose, bring into your inner self the image of something you love very much, something that gives you great satisfaction and pleasure so that you can raise your vibration to the maximum
- Inspired by the previous Rose, imagine the energy of Divine Love, in pink, coming out of your heart and enveloping the first Rose, placing it in a beautiful pink circle, like a bubble
- Cut the roots of the first Rose and let it rise to the center of the Universe. Always ask for it to be done if it is for the greater good
- Explode the third Rose (the pink one)
- Explode the second Rose (the cleansing rose).

Remember to repeat this technique for 7 consecutive days. If you miss a day before completing the 7-day cycle, go back to the beginning.
