History & Lineage

Aura Reading emerged in the 1960s, in California, channeled by Lewis S. Bostwick. Founder of the Berkeley Psychic Institute and the Church of the Divine Man, he channeled and systematized the techniques and tools sent by the angels, to assist in the process of evolution of humanity.

Lineage: Berkeley Psychic Institute → Anastasia Plunk → Angelina Ataide → ROSES OS

LEVEL 1 OF 3

Foundational Practices

Slides 1–18

1

The Rose

The Rose is the foundational symbol and tool of this practice — a living energetic instrument used throughout all levels of the work.

2

Meditation Posture

Proper meditation posture is seated upright in a chair. Feet are flat on the floor, hands resting gently on the thighs or knees, spine upright, eyes closed. The body is relaxed yet alert — grounded and receptive.

3

Grounding Cord

The grounding cord is an energetic connection that extends from the base of the spine (first chakra) downward into the center of the Earth. It anchors your energy body to the planet, providing stability, safety, and a channel for releasing unwanted energy.

4

Golden Sun

The Golden Sun is a tool for replenishing and restoring your own energy. Visualize a radiant golden sun above your head. It calls back your own life-force energy from wherever you may have left it — in people, places, situations, or time. It fills you with your own highest vibration.

5

An Exercise to Feel Your Aura

The aura is the energetic field that surrounds your physical body. This exercise helps you become aware of its presence, its edges, and its quality. The aura consists of multiple layers radiating outward from the body.

6

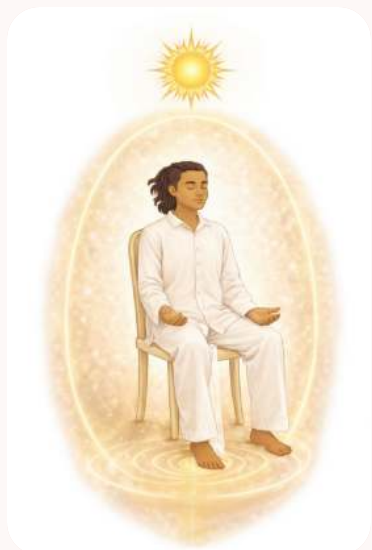

Expansion of Grounding Cord

Once you are aware of your aura, the grounding cord practice deepens. You ground not only the physical body but also the aura itself — allowing the entire energy field to anchor into the Earth.

7

Golden Sun Fills You

The Golden Sun above the crown pours golden light downward, filling the entire aura and body with your own highest vibration. This completes the full energetic architecture: posture, aura, grounding cord, and golden sun — all active together.

8

Circuit of the Energy of the Earth

The Earth circuit is an energetic pathway that draws the energy of the Earth upward through the feet, rising through the legs and into the body. This circuit connects you to the grounding, nourishing, stabilizing force of the planet.

9

Circuit of the Energy of the Cosmos

The Cosmic circuit draws cosmic energy downward through the crown of the head (7th chakra) and into the body. This connects you to the higher frequencies of universal consciousness, inspiration, and spiritual guidance.

10

Circuit of Energy of Cosmos and Earth

When both circuits are activated simultaneously, the energies of the Earth and Cosmos flow together through the body. Earth energy rises from below; Cosmic energy descends from above. They meet and blend within the body, creating a unified field of balanced, integrated energy.

11

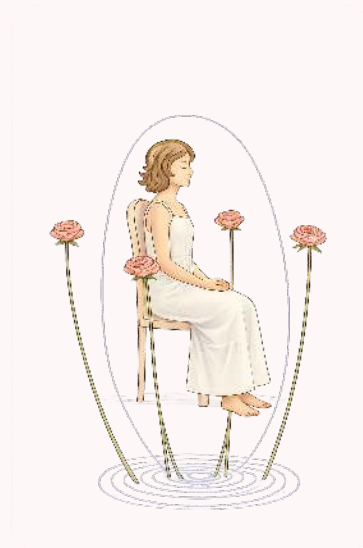

The Rose (as Energetic Tool)

The Rose is used as a living energetic instrument throughout the practice. It has roots (connection to source), a stem (channel of energy), and a bloom (the active, radiant tool).

12

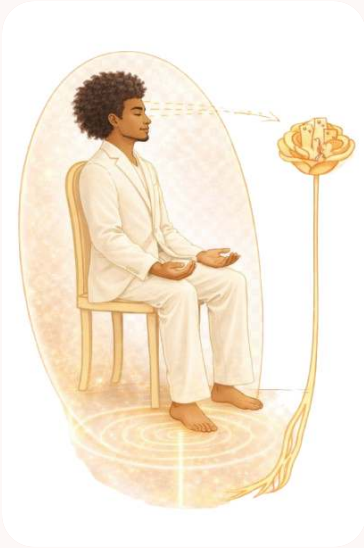

Roses of Protection, Observation and Separation

Roses are placed at the edges of the aura to serve as energetic sentinels. Three functions: Protection (guard the boundary), Observation (notice approaching energies), Separation (healthy energetic distinction).

13

Cleansing Rose

The Cleansing Rose is placed outside of the aura. It absorbs and transmutes foreign or stagnant energy from within your field. Energy that does not belong to you is drawn out and neutralized.

14

Energy Recovery of Each Chakra

After cleansing, the Rose is used to recover your own energy that has been left in or taken by others. The Rose gathers and returns your life-force energy to each chakra, restoring fullness and sovereignty.

15

Pink Rose Closure

The Pink Rose Closure is offered at the end of the meditation as a gift of well-being. Create an unrooted pink Rose and place yourself or the person inside it, visualizing "Happy, Healthy, Whole, Body, Mind & Soul."

16

Discharge Excess Energy

After deep meditation, excess energy may accumulate. Lean forward with hands reaching toward the ground, allowing the excess energy to flow out through the hands and into the earth.

17

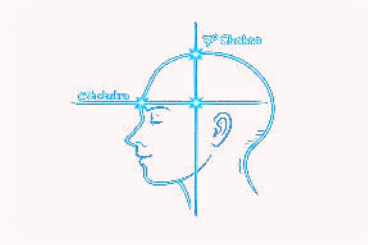

Let's Create Your Sacred Space

Creating your own sacred space — an internal energetic environment that serves as your meditation home. This is the space from which all deeper work is conducted.

18

The 6th and 7th Chakras (Sacred Space)

Understanding the locations and roles of the upper chakras:
6th Chakra (Third Eye) at the center of the forehead; 7th Chakra (Crown) at the top of the head.

LEVEL 1 COMPLETE

18 Foundational Slides

This concludes the Level 1 visual aids. All foundational tools — grounding cord, golden sun, aura, circuits, roses, and sacred space — are now referenced.

8 Circuit of the Energy of the Earth

The Earth circuit is an energetic pathway that draws the energy of the Earth upward through the feet, rising through the legs and into the body. This circuit connects you to the grounding, nourishing, stabilizing force of the planet.

9 Circuit of the Energy of the Cosmos

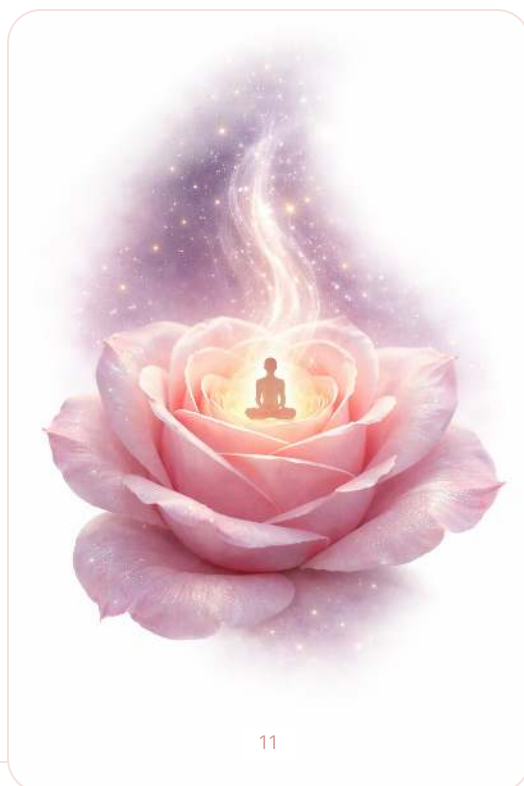

The Cosmic circuit draws cosmic energy downward through the crown of the head (7th chakra) and into the body. This connects you to the higher frequencies of universal consciousness, inspiration, and spiritual guidance.

IO Circuit of Energy of Cosmos and Earth

When both circuits are activated simultaneously, the energies of the Earth and Cosmos flow together through the body. Earth energy rises from below; Cosmic energy descends from above. They meet and blend within the body, creating a unified field of balanced, integrated energy.

I8 The 6th and 7th Chakras (Sacred Space)

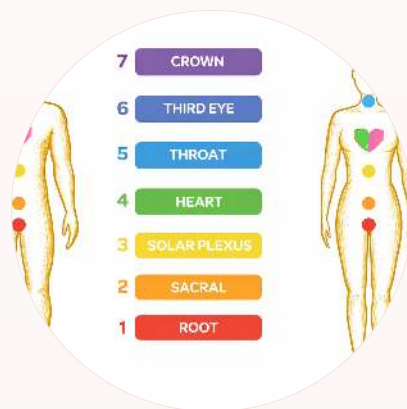

Understanding the locations and roles of the upper chakras: 6th Chakra (Third Eye) at the center of the forehead; 7th Chakra (Crown) at the top of the head.

The Sacred Space is the culmination of Level 1 — where all foundational techniques come together in unified awareness.

LEVEL 2 OF 3

Space Preparation & Chakra Activation

Slides 19–38

19

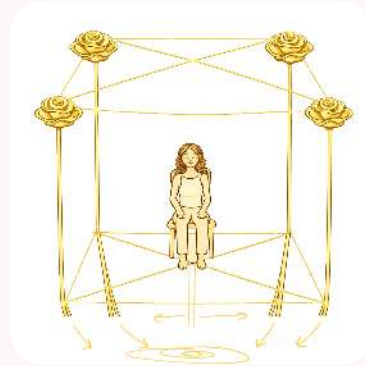

Let's Prepare Your Physical Space

Before meditation, prepare your physical environment to support the energetic work. The external space should mirror the internal intention: clean, clear, quiet, and intentionally held.

20

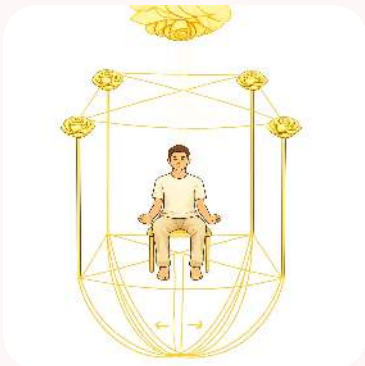

Protection of the Space

The physical meditation space is protected by creating an energetic grid using roses. Golden roses are placed at the four corners, connected by lines of golden energy forming a sacred geometric structure.

21

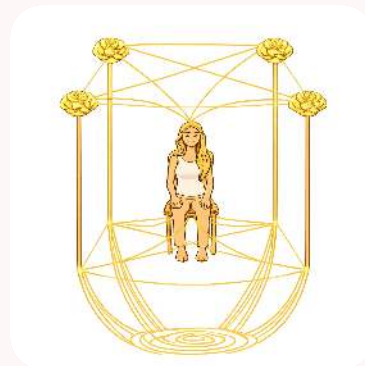

Cleansing of the Space

Once the space is protected, it is cleansed. A large Cleansing Rose is placed above the grid, and golden energy pours downward through the entire structure, clearing all foreign energies.

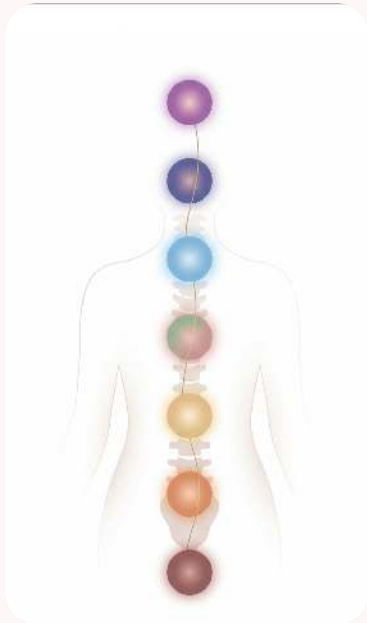

22

Owning Your Space

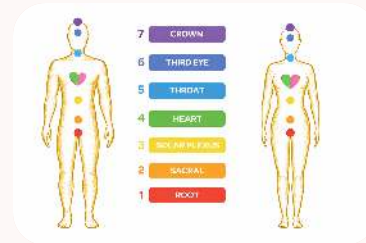

After protection and cleansing, you claim ownership of the space. This is an act of energetic sovereignty — declaring the space as yours, filling it with your own energy and intention.

Let's Talk About Chakras

The chakra system is the energetic anatomy of the human body. There are seven primary chakras, each governing specific aspects of physical, emotional, mental, and spiritual life.

The Seven Chakras

7. Crown — Top of head
6. Third Eye — Center of forehead
5. Throat — Throat
4. Heart — Center of chest
3. Solar Plexus — Upper abdomen
2. Sacral — Lower abdomen
1. Root — Base of spine

32

Cleansing of Each Aura Layer

The aura is composed of seven layers, each corresponding to a chakra. Each layer is individually cleansed.

33

Cleansing of Each Chakra

Each individual chakra is cleansed using roses addressing past and present dynamics.

34

Energy Recovery of Each Chakra

After cleansing, the energy recovery process is repeated at a deeper level.

35

Golden Sticky Roses — Phase 1

Golden sticky roses placed on each chakra, drawing out foreign energy.

36

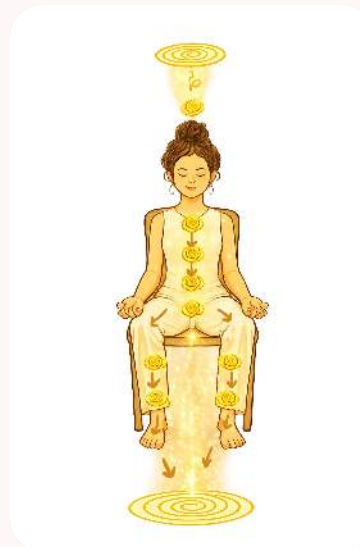

Golden Sticky Roses — Phase 2

Placed at joints and extremities — shoulders, elbows, wrists, hands, hips, knees, ankles, feet.

37

Golden Sticky Roses — Phase 3

Placed throughout the entire body for thorough, complete energetic cleansing.

38

Golden Sticky Roses — Phase 4

A large Golden Rose appears above. All foreign energy is released, and the body is bathed in golden light.

This completes the Golden Sticky Rose sequence — a thorough energetic cleansing of the entire body.

LEVEL 2 COMPLETE

20 Slides — Space, Chakras & Cleansing

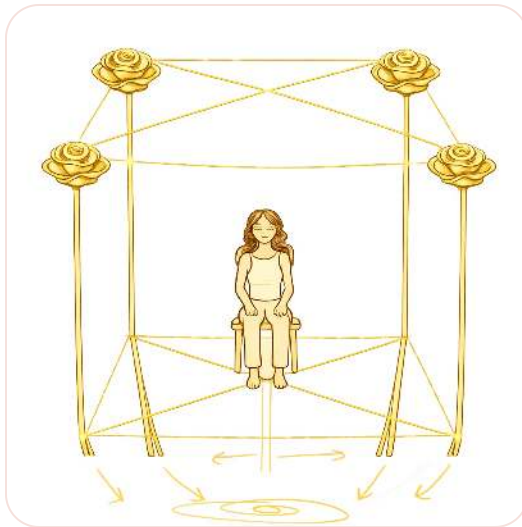

Space preparation, protection, cleansing, chakra system overview, individual chakra activations, aura layer cleansing, chakra cleansing, energy recovery, and the four phases of Golden Sticky Roses.

LEVEL 3 OF 3

Advanced Practice

Slides 39–44

39

The Analyzer

The Analyzer is an energetic point located at the back of the head, at the base of the skull. It is used for deeper perception, reading, and discernment of energy.

40

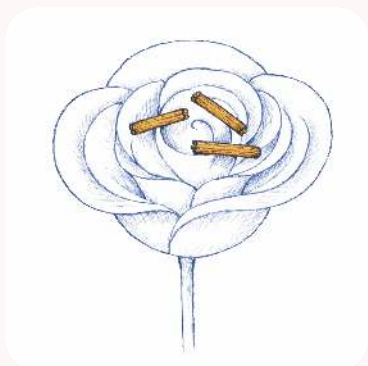

The Analyzer & Sacred Space

A combined reference showing the Analyzer in relation to the sacred space. The sacred space provides the container, the Analyzer provides the perceptive tool.

41

Stick of Agreements

A relationship can only manifest in the material world if sustained by a spiritual agreement. Such agreements may be dissolved by either party through conscious will.

42

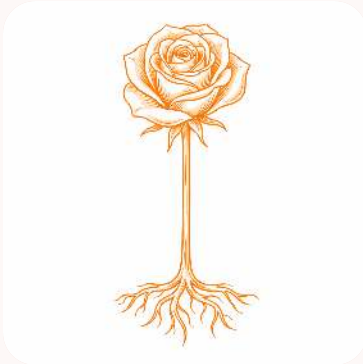

Cutting Cords

We engage in energetic interactions with others constantly. When energetic cords are formed, our auras connect through these ties. It is important to know how to consciously cut them.

43

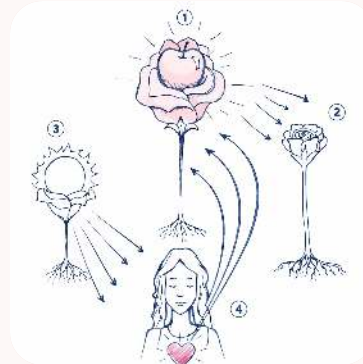

Post Intimacy / Sexual Recovery Rose

After sexual intercourse, if you want to recover energy you may have left with the other person and return energy they may have left with you, follow the recovery steps.

44

Mock Up

A technique for manifesting situations on the physical plane. Must be practiced for seven consecutive days, focused on one goal at a time.

LEVEL 3 COMPLETE

6 Advanced Slides

The Analyzer, sacred space integration, spiritual agreements, cord cutting, post-intimacy recovery, and manifestation through Mock Up.

*The Rose is a technology of remembrance —
